

## Music Industry

Musicians in different places can stay in perfect rhythm **with minimum delay (17 milliseconds)**.

A virtual concert enabled by **5G** connected two Chinese locations 220km apart.

Virtual concerts are accessible in real-time to people attending online.

Musicians in different locations can play and record together live, as if they were in the same room.

With **5G**, more people can stream high-quality audio and video at the same time twice as fast as before.
